

### **Microscopes:**

Micropipettes 500+1000+25+10

- Microscope (15)
- Histological slides (14 )
- Emulsion oil
- Slides + cover slides
- Neubauer chamber
- Reticulocyte solution
- Ammonium
- Tube SML
- Thrombo Plastine \_ calcium
- Centrifuge
- Coatron or other device for :
- Coagulation + tubes
- Giemsa
- Methanol
- Monoclonal antibodies for blood group
- EPTA
- Trisodium citrate
- Heparin
- CRP latex
- Monoclonal antibodies For blood group
- Methanol
- Giemsa

.....

- Tubes
- Water bath
- Optic microscope
- Sulfuric acid
- Glacial Acetic Acid
- Hydrochloric Acid
- Sodium hydroxide
- Hydrochloric Acid gel
- Methuen blue
- Methy red
- Slides and cover slides
- Oven
- Media for bacterial growth
- Centrifuge and hematocrite Centrifuge
- Monoclonal antibodies for blood group
- Stripes for pregnancy test
- Stripes for urinalysis
- Newbauer chamber

***Human skeleton body:***

A large skeleton 2 .

A small skeleton 2 .

A skeleton muscle structure for entire body of 2 .

A skeleton for nursing and totes for the entire body 2 .

A skeleton for arteries and Veins for entire body of 2 .

A Structure for human beings all measurements..

Structure of the pulmonary heart reinforcement 2
